

Bob Byrne is in his first year teaching as a sixth grade teacher at Saint Joseph's Elementary. He is teaching math, science and religion to both sixth grade classes.

Bob has a business degree from Montana State University and recently completed his masters degree from the University of Montana in elementary education. Bob's previous work experience includes jobs with Boeing Commercial Airplane Group and Montana Rail Link. His love of children and desire to spend more time with family led to his career change in teaching.

Bob and his wife Becky have two children who attend SJS, Brayden an eighth grader and Jacob a fifth grader. Bob spends his free time shuffling kids to activities, outdoor recreation, and quality time with family.

"I am honored to have a job where my children go to school. Becky and I have had our children at SJS for the past nine years and we love the emphasis on Catholic education and the community of families that make our school so special."
